

BEARINGS FOR

Outdoor Power Equipment

National Bearings can provide cost-savings, enhanced innovation, and reduced production time for outdoor power equipment product designers.

National Bearings Company is an industry-leading North American bearing manufacturer specializing in custom thrust bearings, radial bearings, angular contact bearings, subassemblies, and bearing components.

You need to design products that are lighter, quieter, cleaner, more efficient and feature-rich than ever. Our skilled engineers, equipment, and experience enable us to develop effective, application-specific bearing solutions for your product needs.

The National Bearings engineers have decades of experience in bearing and assembly design and have created thousands of bearings and components in our nearly 100 years of operation.

We design bearings to fit:

- Your space requirements
- Your performance needs
- Your environmental conditions
- All of your quality specifications

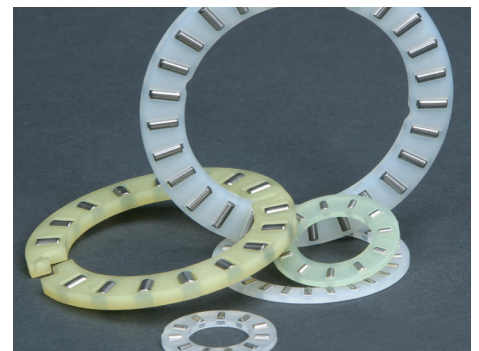

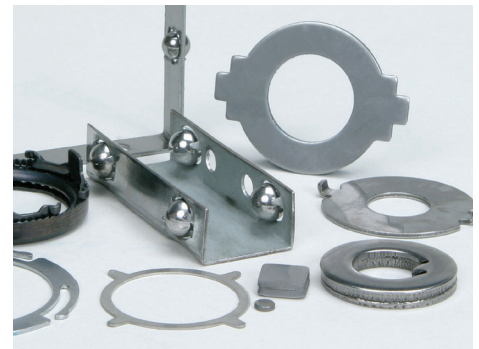

Our experience includes:

- Ariens
- Toro
- Johnson Outdoors
- OTC Powerteam
- Mercury Marine
- Evinrude

Our products and services include:

- Thrust Bearings and Components
- Radial Bearings and Components
- Angular Contact Bearings and Components
- Subassemblies
- Stamping
- Machining
- Injection Molding

- MTD-Cub Cadet
- Superwinch
- McCullough
- Hoffco-Comet
- Homelite

Choose National Bearings for custom bearing and subassembly design from a collaborative partner. Call a Sales Engineer at 717.850.3270 to discuss your project needs or visit www.nationalbearings.com/RFQ to request a quote.
